

The following are the **minimum** hardware requirements for laptop computers:

- We do NOT recommend Google Chromebooks
- Windows compatible laptop with 13" display, Windows 10, Core i5 processor, 8 GB RAM, 256 GB storage.
- MacBook Air or MacBook Pro with 13" display, macOS 10.13 or later, Core i5 processor, 8 GB RAM, 256 GB storage.
- Built-in or external microphone
- Built-in or external webcam
- Anti-Virus Software

IT also recommends the following system configuration for an optimal computing experience:

- MacBook Air or MacBook Pro with macOS 10.15 or later, 13" or 16" Display, Intel Core i7 or better processor, 16 GB or more RAM, 512 GB or larger SSD.
- Important: Apple MacBook Air and MacBook Pro computers are not upgradeable after purchase. Please plan your purchase based on potential future needs, even if it means spending more now.
- Windows compatible laptop with Windows 10, 13"-15" High Definition display, Intel Core i7 or better processor, 16GB or more RAM, 512GB or larger SSD.
- An extended service plan that covers accidental damage.
- Built-in or external microphone
- Built-in or external webcam
- Anti-Virus Software
