

CURRY COLLEGE

2019-2020 EXCELLENCE IN PARTNERSHIPS AND COLLABORATION AWARD

Deanna Gordon, Applied Technology

PARTNERSHIPS AND COLLABORATIONS:

- Epsilon Pi Tau is now a recognized Honor Society at Curry College. This is the first honor society on campus dedicated to students in the Field of Technology. Additionally, Curry College has been awarded its own chapter which will be named Delta Chi. This process took two years, beginning with an evaluation of which honor society would be appropriate for Information Technology and Software Development. Once an organization was identified, a proposal was submitted which included Chapter Charter and Bylaws as well as induction and administrative processes. The application and related materials were presented to the board of Epsilon Pi Tau and approved by the Northeast region in January and was vetted at their annual conference in March.
